

As a traveling salesman who spends a lot of time in my car on the road, I am very happy to have XM satellite radio installed. I rely on XM Radio to keep me informed of news and weather like many people rely on their television for this same information. Before XM radio, I found it impossible to stay connected to what is happening, as local radio signals were either too faint or I couldn't find the correct broadcast. To eventually have news, weather AND traffic conditions in the areas I travel will not only be convenient and give me peace of mind, but it could actually increase my safety on the road.

I am 100% in favor of allowing XM Radio to make my life easier and safer while driving approximately 60,000 miles every year.
